

3G / 4G SERVICES

3G/4G services are a firm reliable option for voice and when catering for high bandwidth users. With coverage options and services available in the main European cruising areas, 3G and 4G are firm favourites for crew and clients alike, and having these services available is now a natural part of the cruising world.

Why VoyagerIP for 3G/4G

VoyagerIP offers services to suit you and your vessels bandwidth requirements, offering the most cost effective way to provide you with the fast download speeds you need across Europe.
