

KU BAND

Ku is one of the widely used VSat bands for marine use.

The services offered can be used on many of the systems in the market today, with speeds available of up to 10Mb/s down, (subject to hardware considerations).

Ku Band VSat will be with us for some time as it covers many of the deep sea routes used by mariners today.

Why VoyagerIP for Ku Band

VoyagerIP has been offering Ku Satellite services since the company began. As one of VIP core services,

Ku band offers multiple coverage options at sea, including trans-Atlantic, Pacific and the Indian Ocean.
